Description

Flying Insect Killer Machine for Home, Restaurants, Hotels & Offices, Insect Control | For All Common Flies

Get rid of flies & mosquitoes with the Flying Insect Killer. This pest control device is designed to kill flies, mosquitoes and other flying insects. The Flying insect killer uses an advanced electrocution technology that instantly kills annoying and disease-carrying bugs. With its high efficiency, it can eliminate insects and flies in an area up to 600 square feet. It is very easy to install and operate. No need for any chemicals. It is also very safe for you and your family.

- Electric fly killers attract germ-laden flies with long-wavelength ultraviolet light and then eliminate them, most often by electrocution.
- UV light of 365nm has the property to attract insects or flies and helps to bring them closer to the electric machine, get them electrocuted, and die.
- Insect killer used as a Tool to Kill the Flying Insects which protect yourself and your family from dengue, chikungunya and other diseases. Safest and most economical way of killing flying insects.
