

An advanced chemistry to control termites

Envu presents Agenda[®] 25 EC, for assured termite control combined with a colony management effect.

- ✓ Used for pre & post-construction (above the ground treatment) for efficient termite management
- ✓ GreenPro certified
- ✓ Non-repellent
- ✓ Domino effect
- ✓ Long lasting
- ✓ Evaluated by CBRI

Insecticide for effective termite management

Active Ingredient:

Fipronil 2.92% EC

Recommendations for use:

Agenda® is used for the control of termites in buildings through pre & post-construction anti termite treatments.

Key Features and Benefits:

Non-repellent & odorless termiticide, hence termite cannot recognize the chemical barrier and pass through it

Good soil binding properties facilitate the retention of active ingredient, minimal leaching potential into ground water

Flexible in use – Can be diluted in water as well as deodorized kerosene

Gets readily transferred between one termite and another, through contact, trophylaxis and grooming - Domino effect

Long term protection and colony management

GreenPro certified by IGBC-CII

Evaluated by Central Building Research Institute (CBRI)

Mode of Action:

Fipronil disrupts normal nerve influx transmission (e.g. passage of chloride ions) by targeting the GABA-gated chloride channel, causes excessive neural excitation, severe paralysis, and insect death. It is also considered a selective GABA antagonist because it shows a greater binding affinity to insect than to mammal GABA receptors.

Dosage:

*Post-construction - 15 ml/ lit of water

*Pre-construction - 25 ml/ lit of water

(*As per Agenda dosage guideline dated 12th November 2018)

Antidote:

Specific antidote is not known. Treat symptomatically.

Packs:

100 ml, 500 ml, 5 litres

Always read and follow label instructions.
